

High-Speed(25+Gbps) BGA Mezzanine Connectors

IT5 Series

Flexibility

Hirose's IT5 mezzanine connector system is as comfortable in today's data rates of PCIe and XAUI as it is in tomorrow's 25+Gbps systems.

With the ability to transmit differential, single-ended, and power through one package and being stackable from 14 – 40mm, IT5 can solve your interface needs for both current and future generations.

Mechanical features

- Unique 3-piece structure for flexibility
- Stacking heights from 14 to 40mm
- Staggered 1.5mm × 1.75mm ball grid array
- Number of Contacts: 100, 200, & 300 signals + 110% additional grounds
- Differential, single-ended, and power
- Low mating/extracting forces
- Wide misalignment tolerances for multiple connector use
- Pb-free are available
- Excellent reflow solderability

Signal integrity features

Insertion loss to Crosstalk Ratio (ICR)

The ICR performance meets the extrapolated IEEE 802.3ap specification for 16GHz with fully-populated pin assignment, and 25+Gbps differential data transmission requirement.

Return Loss

The differential return loss with vias and 1 inch PCB trace meets the extrapolated IEEE 802.3ap specification beyond 20Gbps.

Stacking height variations

Product Specifications

Rating	Current Rating: 0.2A / pin (note 1)	Operating Temperature Range: -55°C to +85°C
	Voltage Rating: 50Vrms	Operating Humidity Range: For relative humidity, 90% max (no condensation is permitted)
	Storage Temperature Range: -10°C to +60°C	

Item	Specification	Conditions
1. Insulation Resistance	1000MΩ min.	100V DC
2. Withstanding Voltage	No flashover or insulation breakdown	150V duty for 60 seconds (2mA max leak)
3. Contact Resistance	MATED WITH IT5**-**P-H(**) 50 mΩ MAX (*2) (Height: 14 ~ 16 mm) 60 mΩ MAX (*2) (Height: 18 ~ 20 mm) 70 mΩ MAX (*2) (Height: 21 ~ 24 mm) 80 mΩ MAX (*2) (Height: 25 ~ 28 mm) 90 mΩ MAX (*2) (Height: 29 ~ 32 mm) 100 mΩ MAX (*2) (Height: 33 ~ 36 mm) 110 mΩ MAX (*2) (Height: 37 ~ 40 mm) MATED WITH IT3**-**P-H(**) 50 mΩ MAX (*2) (Height: 15 ~ 24 mm) 55 mΩ MAX (*2) (Height: 25 ~ 32 mm) 60 mΩ MAX (*2) (Height: 33 ~ 40 mm)	100mA
4. Vibration	1) No electrical discontinuity of 1μs or more 2) No damage, crack, or loose part	Frequency: 50 to 2000Hz; power spectrum density: 0.1G²/Hz for 90 minutes in three directions
5. Cyclic Temperature and Humidity	1) Contact resistance change: 20mΩ or less 2) No damage, crack or loose part	25°C, 80% RH: 60 min dwell time, 30 min ramp time 65°C, 50% RH: 60 min dwell time under 24 cycles
6. Durability (Mating/Un-mating)	1) Contact resistance change: 20mΩ or less 2) No damage, crack or loose part	100 cycles (Height: 18 ~ 40 mm) 30 cycles (Height: 14 ~ 16 mm)

Note1: Refer to IT5 derating curves on test report TR636E-20282 for power application.

Note2: The value of contact resistance includes 2 contact points and the bulk resistance.

Material Information

●Receptacle

Component	Material	Finish & Remarks
Housing(Mounting Side)	LCP	Black , UL 94V-0
Housing (Detachable/Mating Side)	LCP	Gray , UL 94V-0
Locator	LCP	Black , UL 94V-0
Contact	Copper Alloy	Contact Area : Gold (0.76 μm) over Nickel (1.5 μm) Mounting Area : Gold (0.05 μm) over Nickel (1.5 μm) Other : Nickel (1.5 μm)
Solder Ball	Tin (Pb-Free)	Sn(96.5)-Ag(3)-Cu(0.5)
Tray	Polystyrene	Gray
Pick Up Cap	Stainless steel	300pos
Pick Up Tape	Paper (Nomex)	100pos and 200pos

Signal Integrity

Pin assignment

For the fully-populated pin assignment, adjacent pins are grouped into differential pairs as shown in the figures below. In the following data, one victim pair and eight aggressor pairs are included.

Impedance profile at 15, 30ps rise time (20-80%)

The impedance profiles (of connector only) for the center pair are shown below. The IT5 receptacles are designed with higher impedance to offset the via's low impedance.

Differential propagation delay

Stacking Height (mm)	18	35
Delay (ps)	112.34	230.64

Differential Insertion Loss

The differential insertion loss is less than -2dB up to 12GHz.

●Differential Return Loss

The differential return loss with vias and 1 inch PCB trace meets the extrapolated IEEE 802.3ap specification beyond 20Gbps.

**18mm
Height**

**35mm
Height**

●Differential Near-End Crosstalk (NEXT)

The near-end crosstalk at the center pair from surrounding 3 aggressors is shown below. The NEXT is not as critical because TX and RX can be grouped into separate wafers.

**18mm
Height**

**35mm
Height**

●Differential Far-End Crosstalk (FEXT)

Low far-end crosstalk at the center pair from surrounding 3 aggressors is observed. Even lower crosstalk can be achieved by skipping pins.

**18mm
Height**

**35mm
Height**

●Insertion-Loss-to-Crosstalk-Ratio (ICR) for FEXT

The insertion-loss-to-crosstalk-ratio (ICR) for 8-aggressor FEXT meets the extrapolated IEEE 802.3ap specification up to 16GHz.

**18mm
Height**

**35mm
Height**

Receptacle

■PCB footprint

Mounting Receptacle - IT5(H)M

Mating Receptacle - IT5(H)D

- 1 Minimum clearance for all devices
- 2 Minimum clearance for sensitive devices

Dimension	100	200	300
A	15.75	33.25	50.75
B	28.10	45.60	63.10
C	30.10	47.60	65.10

■Spacers

Spacers are required to support the PWB's and protect the BGA solder joints.

Suggested spacer style is shown below:

Spacer, male-male, M3 thread

The recommended spacer height corresponds to the interposer stacking height as shown in the chart below:

Stacking Height	Recommended Spacer Height	Stacking Height	Recommended Spacer Height
14 mm	14 +/-0.1 mm	28 mm	28 +/-0.127 mm
15 mm	15 +/-0.1 mm	29 mm	29 +/-0.127 mm
16 mm	16 +/-0.1 mm	30 mm	30 +/-0.127 mm
18 mm	18 +/-0.127 mm	32 mm	32 +/-0.127 mm
19 mm	19 +/-0.127 mm	33 mm	33 +/-0.127 mm
20 mm	20 +/-0.127 mm	34 mm	34 +/-0.127 mm
22 mm	22 +/-0.127 mm	35 mm	35 +/-0.127 mm
23 mm	23 +/-0.127 mm	36 mm	36 +/-0.127 mm
24 mm	24 +/-0.127 mm	37 mm	37 +/-0.127 mm
25 mm	25 +/-0.127 mm	38 mm	38 +/-0.127 mm
26 mm	26 +/-0.127 mm	39 mm	39 +/-0.127 mm
27 mm	27 +/-0.127 mm	40 mm	40 +/-0.127 mm

Recommended Spacer Location

$\phi 3.5$
Non plated through hole

Two spacers located diagonally are minimally required. Some applications may require 4 spacers. Spacers should be located 10 – 50 mm from the corners of the receptacles to prevent excessive mechanical loading on the interconnections. If assembly will be subjected to vibration, spacers should be located to prevent resonance, and additional spacers may be required.

Interposer installation

Position interposer directly over mounting receptacle, aligning the polarity chamfers.

If positioned properly, the interposer should slide easily onto the mounting receptacle. Place installation cap onto interposer and push straight down to engage the locking latches.

Manual Installation

*Installation caps are available upon request for manual operation

Press firmly on installation cap only, not on wafers or interposer body

Always support PWB from underside to prevent flexing

■ Daughter card installation

After the interposer is mounted, install spacers onto motherboard. To install mating receptacle, align the spacer holes in the daughter card with the threads on the spacers.

The spacers help align the mating receptacle with the interposer. If positioned correctly, the mating receptacle will slip down into the interposer.

Push directly down on the assembly to lock the mating receptacle in place. Install nuts onto the spacer threads. Tighten nuts to specified torque.

■ Daughter card removal

To remove a daughter card, first remove the nuts from the reinforcing spacers, then lift the daughter card straight off the interposers, as shown right.

Interposer removal

Interposer Removal by Hand

- 1) Hold the Interposer Assembly on the walls without locking latches

- 2) Gently rotate one side of the Interposer Assembly laterally 10° maximum

Caution: do not rotate more than 10 degrees

- 3) While gently rotating, pull up on other side of the Interposer Assembly

- 4) The Interposer Assembly is removed, and the Mounting Receptacle is ready to accept another Interposer Assembly.

An interposer removal tool is also available. This tool is not an interposer installation cap, so please do not use it to install an interposer. Doing so may damage an interposer.

Interposer Removal with Tool

- 1) Cover the interposer Assembly with the interposer removal tool

- 2) Gently rotate one side of the Interposer Assembly laterally 10° maximum using the tool

Caution: do not rotate more than 10 degrees

- 3) While gently rotating, pull up on other side of the tool

- 4) The Interposer Assembly is removed, as it is inside the tool

Precaution

Visually inspect the interposer before reinstalling it. Discard if it shows any sign of damage or wear. Do not subject the interposer assembly to more than five removal-reinstallation cycles, even if it appears unaffected. Removal Tools are available upon request for IT5M1-***P-14H(03).

■Assembly reflow soldering profile

Parameters	Pb-Free	Comment
Preheat Ramp Rate	2 - 3°C/sec	Other components may limit ramp rate to 2°C/sec
Soak Time	0 - 120 sec	Soak requirements determined by board design, oven capability, and paste activation requirements
Soak Temperature	160 - 215°C	Caution - "oversoaking" may exhaust flux and affect soldering
Peak Reflow Temperature	230 - 250°C	Cooler peak temperatures may require longer TAL's
Time Above Liquidus (TAL)	45 - 120 sec	Shorter TAL's may require higher peak temperatures
Cooling Rate	>6°C/sec	Faster cooling rates produce finer grain structures and smoother joint appearances
Maximum Package Body Temperature (T)	260°C	Open body design allows for low delta T between package and solder joint
Maximum Delta T between Body and PWB at Liquidus	10°C	Standard practice is easy to achieve with open body design
Package Body Exposure Limit at Maximum Temperature	5 sec	Adjust profile if maximum exposure limit is approached or exceeded

Reflow Profile

Different solder pastes have different thermal performance characteristics. Consult with paste manufacturer for optimum profile settings. Check thermal exposure limits of PWB laminate if processing with Pb-free solder.

■Mating self alignment

*Unit: mm

■Mating tolerance

Due to its 3-piece design, the IT5 connector system can accept mating tolerances of up to ± 0.3 mm tolerance in the X-axis and up to ± 0.2 mm in the Y-axis.

■Packaging information

Please order per box with its Minimum Order Quantity (MOQ) of connectors contained.
The number for each configuration is shown below.
